

# Teams for MVP

## Team 1 - Frontend Team

**Developers: 1**

- Customer app
- Provider Dashboard
- UI development
- State management
- Integrating auth, booking flow, notifications
- Handling API calls

This team produces:

- Services page
  - Search page
  - Account page
  - Provider dashboard
  - Booking screens
- 

## 2. Backend + Infrastructure Team

**Developers: 1**

- Develop BookingService logic
- Integrate PaymentService

- Build SearchService
- Build Provider acceptance workflow
- PostgreSQL schema design
- Provider availability system
- Notifications backend

This team produces:

- All backend APIs
- Database tables
- Search logic
- Matching logic
- Provider confirmation workflow
- Payment service
- Infrastructure (Cloud Platform)

---

## Phase II Team Structure

Between MVP and **Phase I**, there are very few changes, so the team stays the same. It only for **Phase II** that the team needs to improve

**Teams: 2 teams**

**Total developers: 4**

Phase II introduces:

- Provider-first flow (search → acceptance → payment)

- SearchService improvements
  - Early ratings & reputation foundation
  - Reliability improvements
  - Scale planning
- 

## **Mobile Frontend Team – 1 dev**

Still responsible for the whole app, but now with:

- Better UX
  - Real-time updates
  - Chat UI
  - Refactoring and optimization
- 

## **Backend Core Team – 3 devs**

- Improved SearchService
- WebSocket real-time system
- Matching algorithm improvement
- Data usage and presentation
- Database migrations
- Scalability architecture
